## *Presents: NewTech Home/SME Vsat Solution*

*This is a Second generation Ku-band Vsat Broadband Internet solution otherwise known as Fiber in the Air. This current solution has been described as the answer to most speed challenges faced by Vsat users.*

### BENEFITS

- Experience internet browsing speed like never before.
- Uses ACM, Adaptive Coding & Modulation which maximizes throughput regardless of link conditions. ACM turns fade margins into increased link capacity gain of up to 100%.
- DVBS2 Technology- helps achieve a significantly better performance, allowing for an increased bitrate over the same satellite transponder bandwidth. The measured DVBS2 performance gain over DVBS is above 30%. DVBS2 is the second generation specification for satellite broadcast.
- Smaller 1m antenna which can be installed on a wall makes equipments cheaper and installation easier.
- Advanced satellite modem with self install capabilities, means installations that previously lasted two days can now be done in a matter of hours.
